We have helped more than 50 companies from Europe and the USA.

- USA
- Norway
- Finland
- Denmark
- Estonia
- Latvia
- Lithuania
- UK
- Ireland
- Germany
- Italy

Those We Cater To

Startups

We cooperate with small yet promising startups, providing them with guidance on their web products or helping them develop an MVP and subsequently improve it in order to attract first clients and raise funds.

SMEs

We develop bespoke software solutions for SMEs to accelerate their digital transformation process. Our tailored products help companies gain a solid competitive edge in an ever-changing business landscape.

Enterprises

For enterprises, we can offer the development of reliable and effective cloud-based applications that can be easily integrated with other systems and effortlessly scaled when needed. Our engineers put sustainability at the forefront of such software solutions.

Our Clients

SNAP

Leading US HealthTech Provider

bloX.move

Modern Irish Mobility Company

Prominent UK InsurTech Agency

MessageBuy

Popular US eCommerce Tool

Danish Cybersecurity Company

AVi Medical

German Chain of Modern Clinics

Sellix

Our Core Values

We rigorously stick to our core values from the very first day.

Easy and professional communication

It is not challenging to find a common language with us.

Transparency of the development process

Our work is transparent – we have nothing to hide from our clients.

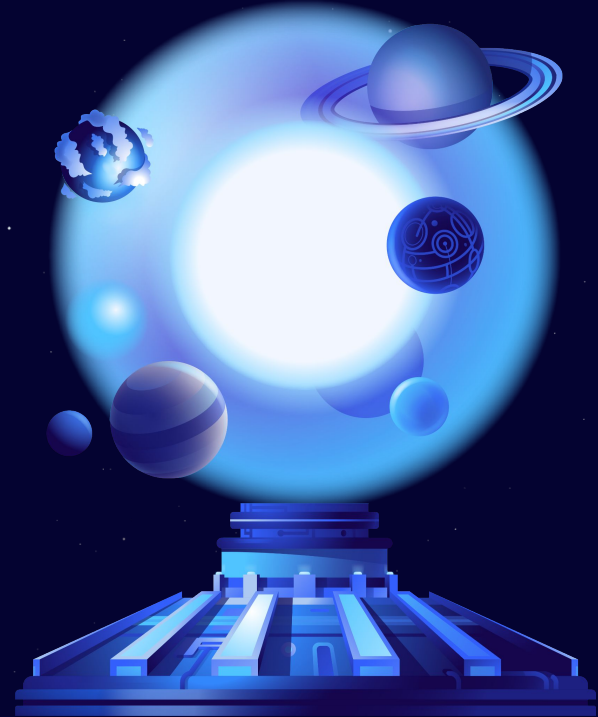

Truly Cutting-Edge Technologies

We create the world of the future having both feet on the ground.

Safety and sustainability of products

We make software solutions that will serve you for many years.

Transparent Collaboration

The Power of Clear Communication in Collaboration

Our Approaches to Software Development Projects

Full-Cycle Software Development

With a dedicated team overseeing the entire project, there is greater control over the quality of the software and adherence to the project's goals and requirements.

Team Augmentation

Working alongside external professionals brings fresh perspectives, best practices, and knowledge transfer to the existing team.

Our Software Development Services

Cloud App Development

Harness the power of cloud computing to build scalable and accessible applications.

Business Automation

Streamline and optimize your business processes through automated workflows and intelligent systems.

Mobile Development

Create innovative and user-friendly mobile applications for various platforms and devices.

Browser Extension Development

Extend the functionality of web browsers with custom-built extensions that enhance user experiences, provide additional features, and simplify online tasks.

System Integration

Seamlessly connect and integrate different software systems to enhance efficiency and data flow within your organization.

Legacy Software Re-engineering

Modernize and revitalize your outdated software systems to align with current technologies and business needs.

Our Cutting-edge Services

Data Science

Uncover valuable insights from complex and large datasets using statistical analysis and advanced algorithms to drive informed decision-making.

Artificial Intelligence

Develop intelligent systems and algorithms that can simulate human intelligence, enabling machines to learn, reason, and make autonomous decisions.

Machine Learning

Empower machines with the ability to learn and improve from experience, enabling them to perform tasks and make predictions without explicit programming.

Big Data

Manage and analyze vast volumes of structured and unstructured data to extract meaningful patterns, trends, and insights that can drive business growth.

Internet of Things (IoT)

Connect physical devices and objects to the internet, enabling them to communicate, exchange data, and interact with each other, leading to smart and interconnected systems.

Blockchain

Utilize a decentralized and transparent ledger system to securely record and verify transactions, ensuring immutability, trust, and integrity in various industries such as finance, supply chain, and healthcare.

Our Organization and Processes

Our Workflow

Launch your very software product in 4 easy steps!

01

Research and Consultation

Gathering insights and expert advice to identify potential challenges and opportunities.

02

Planning and Staffing

Making a comprehensive plan and assembling the right team with the necessary skills and expertise.

03

Designing and Development

Creating the project's architecture and transforming it into a functional software solution.

04

Deployment and Maintenance

Implementing the solution and ensuring ongoing stability and performance.

Our Management Team

Alexey Kalachik
CEO & Co-Founder

CEO at Fively since 2018. Co-founder at DogQ (a zero code testing automation platform).

Igor Yakutovich
Co-Founder & IT
Consultant

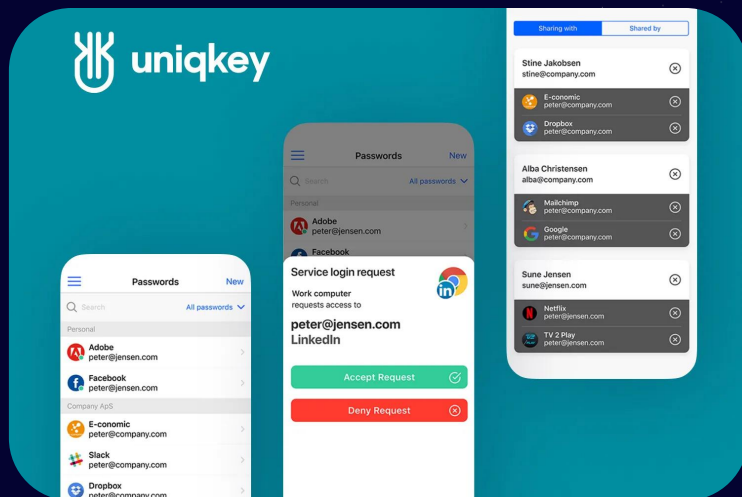

Over 10 years of experience as a Team Lead, Architect, Developer, Manager and Business Analyst.

Success Stories

Identity-Access Management Automation: Uniqkey

We have created an identity and access management automation system that is recommended for use even by the association of Danish Auditors.
