- Healthcare

Industries we serve

Why clients choose Axon?

- 1 Result-oriented processes
- 2 Industries experts
- 3 Recommended by clients
- 4 Transparent and predictable
- 5 Flexible and scalable

Our clients

Fabnite

Norway

Digital ecosystem for handling events

Fabnite is a complete digital ecosystem for handling events and venues of all sizes and categories. The solution includes web and mobile applications.

Our clients

Moodie

Norway

Streaming service

Moodie was a streaming service that allowed artists, athletes and various professionals conduct online broadcasting of events both through mobile applications and for web users. During broadcasts, viewers could chat online with performers, make donations, etc.

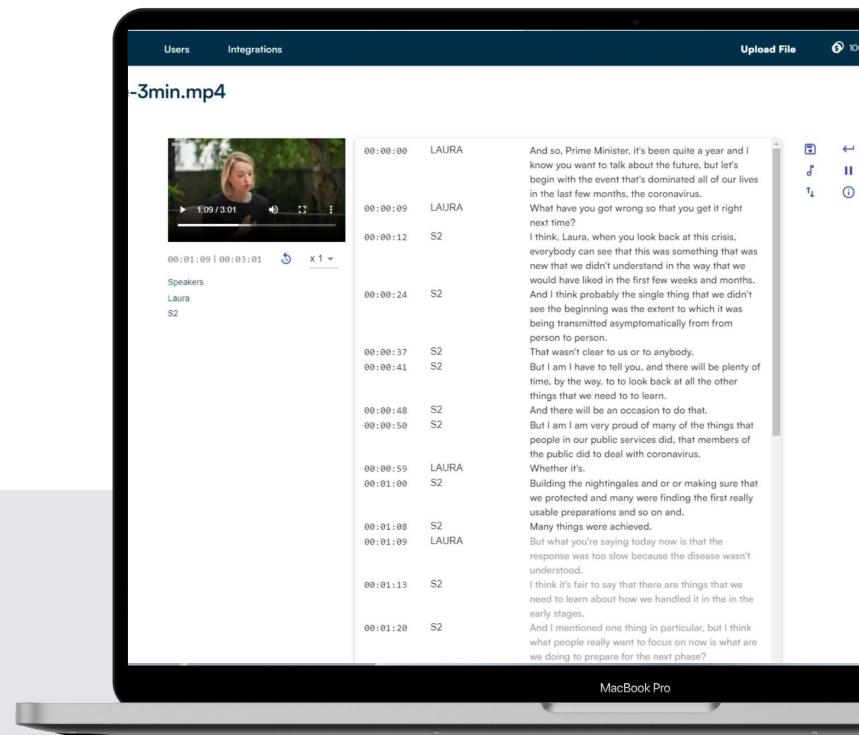

Our clients

Denmark

Software for automatically
transcribing videos into text

Txtplay is an AI tool that transcribes the audio from your mediafile to what is said. When the transcript is ready, you can download it as a simple text file or as closed captions to your video.

Our clients

FC Shakhtar

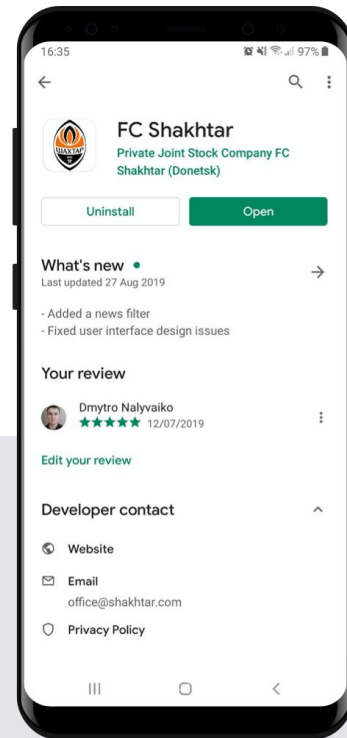

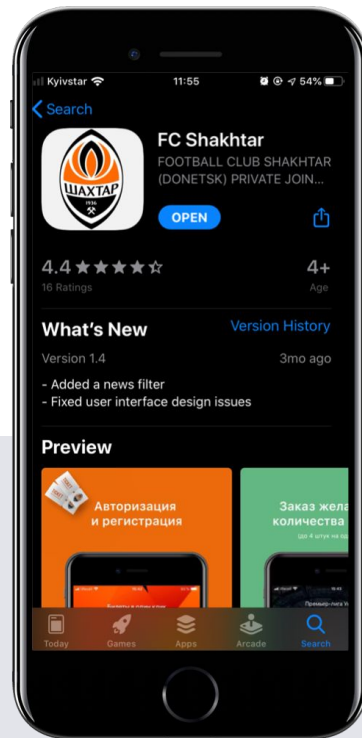

Ukraine

Mobile application for the football club

FC Shakhtar is one of Ukraine's most decorated football clubs. We developed the app that allows their fans subscribe to the premium content: online chats with players, video-streamings of the team trainings, interviews, etc.

[Learn more about this project](#)

Our clients

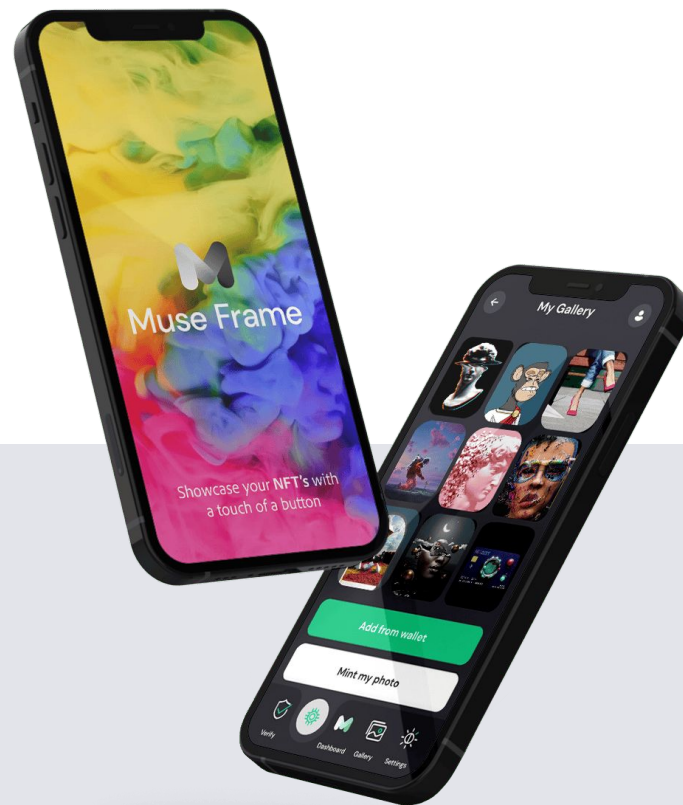

Muse Frame

Australia

A digital frame for NFT masterpieces

Muse Frame is dedicated to digital art projects which allows the connection of digital wallets and shows entire art galleries on physical frames.
