# Cross-functional teams for your success

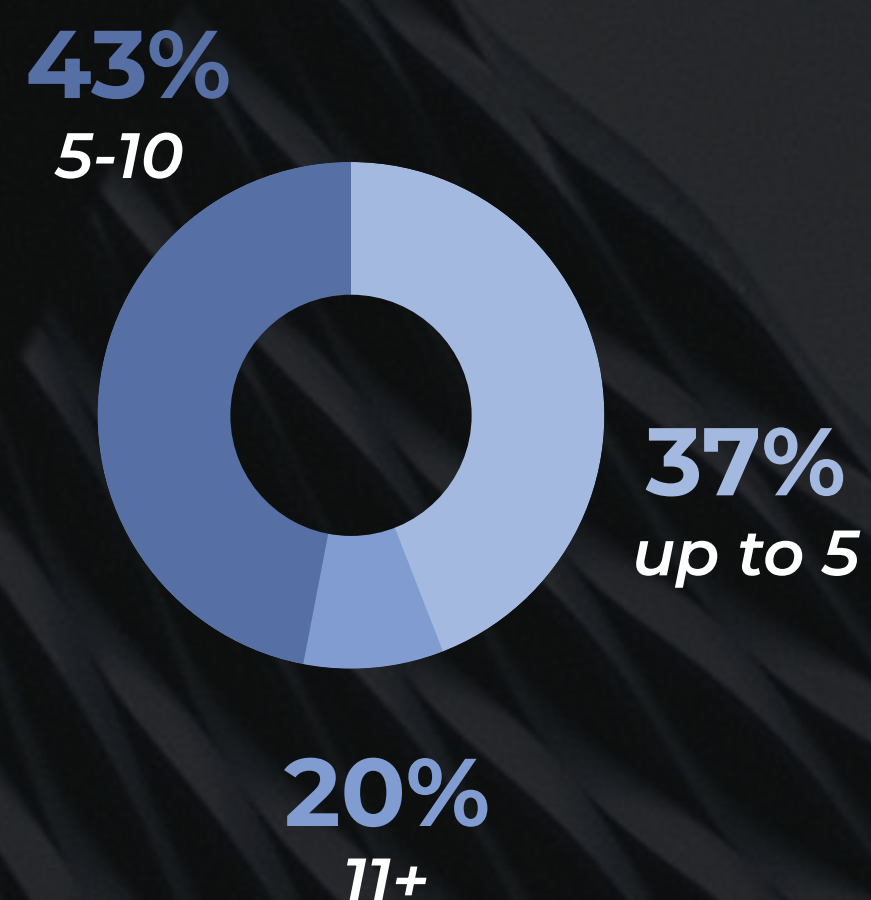

*“The capability of a team is always greater than that of one person and the team interaction often leads to new insights. You may first feel like sinking in a swamp of stuff, but we believe that eventually, the discrepancies will be eliminated and everything, just as it was said in “Alice in Wonderland”, “...will fall into place and rank a single beautiful scheme.”*

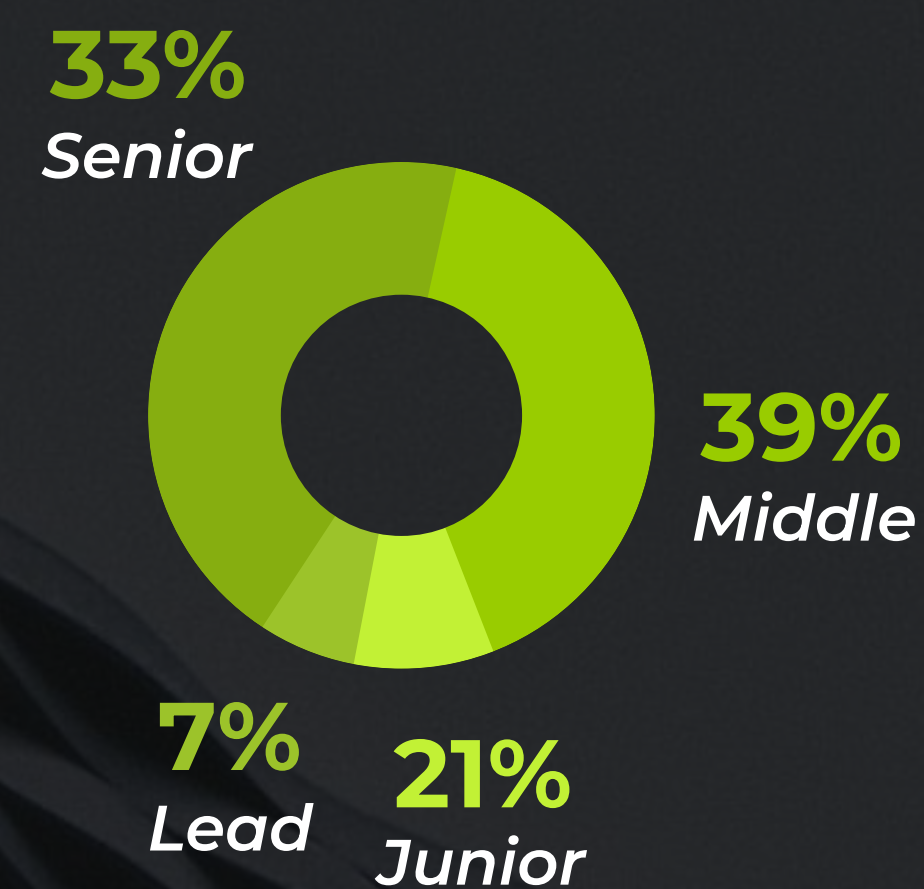

**Alexey Spas**

CEO and Co-founder

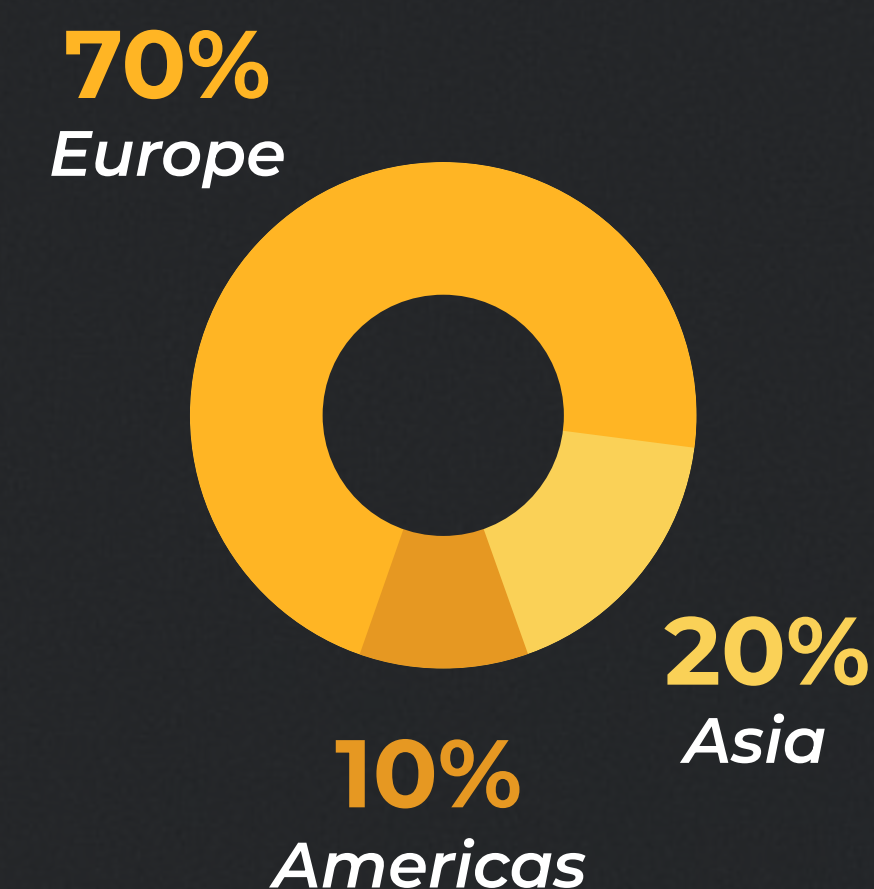

## Years at \*instinctools

## Seniority level

## Location

Software developers

Product designers

QA engineers

Solution architects

DevOps engineers

Business analysts
