

CUSTOM SOFTWARE DEVELOPMENT COMPANY

BRAINS. HANDS. PERSONALITIES.

CODERIDERS PHILOSOPHY

Custom software development made simple. Just like riding a bike.

OUR VISION

Time is precious. Automation should save it.

OUR MISSION

Build simply powerful systems with state-of-the-art technology and innovation to automate business processes.

OUR VALUES

- Excellence
- Genuine Care
- Team Spirit

WE HAVE BEEN DEVELOPING SOFTWARE SINCE 2013

CodeRiders started as a web development school, having only \$50 start-up capital.

2016 - 2017

The team worked on a few large e-commerce and CRM projects for retail, wholesale, healthcare, and entertainment industries.

2014 - 2015

We invited our best students to make the team CodeRiders and work on projects for software development companies in USA, Canada, Australia, New Zealand, Europe, Middle East, Hong Kong, etc.

2018 - 2020

We developed business intelligence, enterprise software, and IoT projects for smart home, edTech, and finance industries.

NOW

Currently we are developing custom software development solutions for Web3, NFT, Media and entertainment, Real estate, Business automation, and Sport industries.

FUTURE

Enlarge the custom software development team at least twice, as well as build CodeRiders B2C Business Intelligence tool.

ENGAGEMENT MODELS

PROJECT BASED

Send us your technical documentation or SOW paper, and we will get back to you with time and budget estimates for your project.

TIME AND MATERIAL

Don't you have any documentation of your requirements? You don't have to worry. We can move forward with hourly costs and monthly payments.

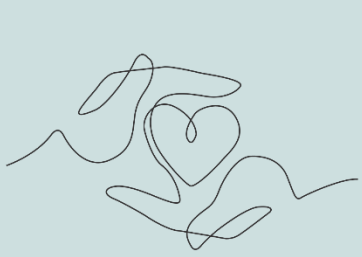

STAFF AUGMENTATION Dedicated developers

Do you need dedicated developers and other professionals to join your current team and help you with ongoing tasks? Longer projects that require a larger team size will have discounted costs.

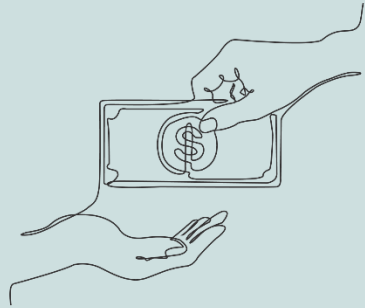

HYBRID MODEL

If you want to make changes to any of our engagement models, we welcome you. We can discuss your options and see how our team can be a perfect help for you.

WE TAKE CHALLENGES IN THESE MAJOR INDUSTRIES, AND NOT ONLY

- ✓ You are the owner of the code
- ✓ Dedicated project manager
- ✓ CTO's direct management
- ✓ Secure co-operation
- ✓ Developers of different seniorities
- ✓ Fluent English
- ✓ Proven testimonials
- ✓ Regular reports
- ✓ Flexible options to pay
- ✓ Close to reality estimates
- ✓ Possibility to scale up the team
- ✓ Maintenance and support

RELATIONSHIP WITH CLIENTS

MENTIONED AS A FAIR AND A TRUSTFUL CLIENT OUR PARTNERS

CodeRiders was a very efficient software development house and were very responsive to our communication. The management team went out of their way to remain fair and open to any negotiations that needed to occur throughout the project. CodeRiders was also very happy to obliged to all Binary City's strict security and privacy policies that needed to be enforced on this project. They were eager to listen to Binary City's management team when conflicting matters arose during the project. It was a pleasure to be able to straighten out such issues on such a level. Binary City looks forward to align new projects with CodeRiders that we can work on together in the future.

CASE STUDY: PROPERTY MANAGEMENT SOFTWARE AND APP DEVELOPMENT

CHALLENGE:

Rewrite the RedRabbit Inspection app from the ground up.

The purpose of the PropTech project is to allow users to record the conditions of properties when doing inspections along with photos, signatures, etc., and then synchronize that information with the backend system efficiently.

CLIENT NAME	Sinov8
COUNTRY	 South Africa
INDUSTRY	IT and software
TEAM COMPOSITION	5 members
DURATION	2 years
SERVICES PROVIDED	Mobile development, System integration services, Web development, Software outsourcing

CASE STUDY: PROPERTY MANAGEMENT SOFTWARE AND APP DEVELOPMENT

SOLUTION:

Using Flutter technology, we have successfully built the following features:

- ✓ Schedule, download, and review inspection details
- ✓ Inspection creation wizard, allowing to select or create a property and contacts
- ✓ Stunning capturing screen that is super feature-rich with beautiful animations
- ✓ Built-in camera with features such as tap to focus and flash

Feedback: "It's been such a pleasant experience the last 2 years working with CodeRiders and their team, and I sincerely hope we will do much more development together in the future." *Hein Hanekom, CEO, Sinov8*

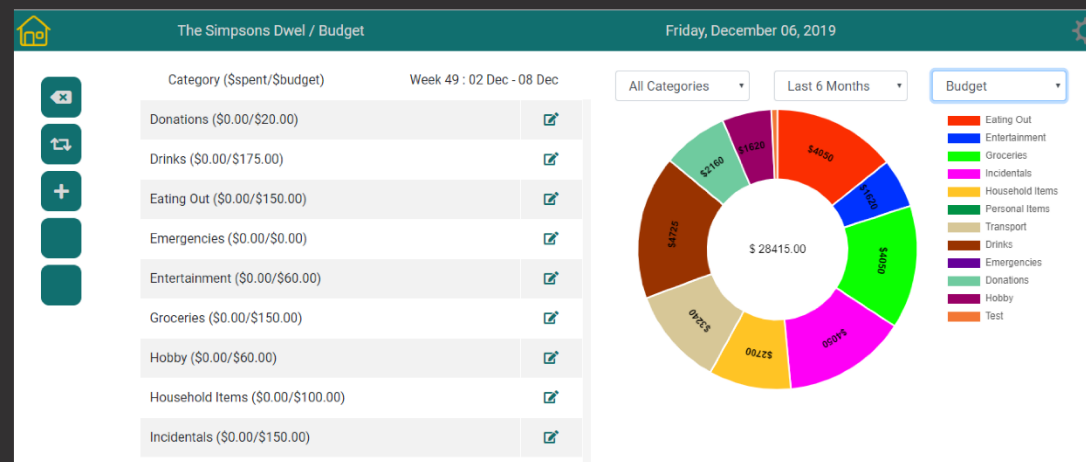

CASE STUDY: LIFESTYLE MANAGEMENT SOFTWARE (IOT)

CHALLENGE:

Develop a private, cloud-based operating system that helps to manage every aspect of digital life

Dwel platform is specifically for managing family life and maintaining an efficient household, so the users will have more free time. Project goal is to streamline and automate household activities – such as meals preparation, house chores, record keeping, budgeting, document management, and a few others.

CASE STUDY: LIFESTYLE MANAGEMENT SOFTWARE (IOT)

SOLUTION:

CodeRiders built the Dwel platform, which is a single place from where the users can control all their smart things: turn on lights, regulate temperature, operate TVs, send music to speakers, lock doors, open blinds, turn on sprinklers, etc.

- ✓ Document management system
- ✓ Finance management system
- ✓ Shared calendar
- ✓ Meal planning software and cooking system
- ✓ Task management system
- ✓ Shopping list for groceries
- ✓ Message board
- ✓ Newsfeed app
- ✓ System setup and software configuration management app

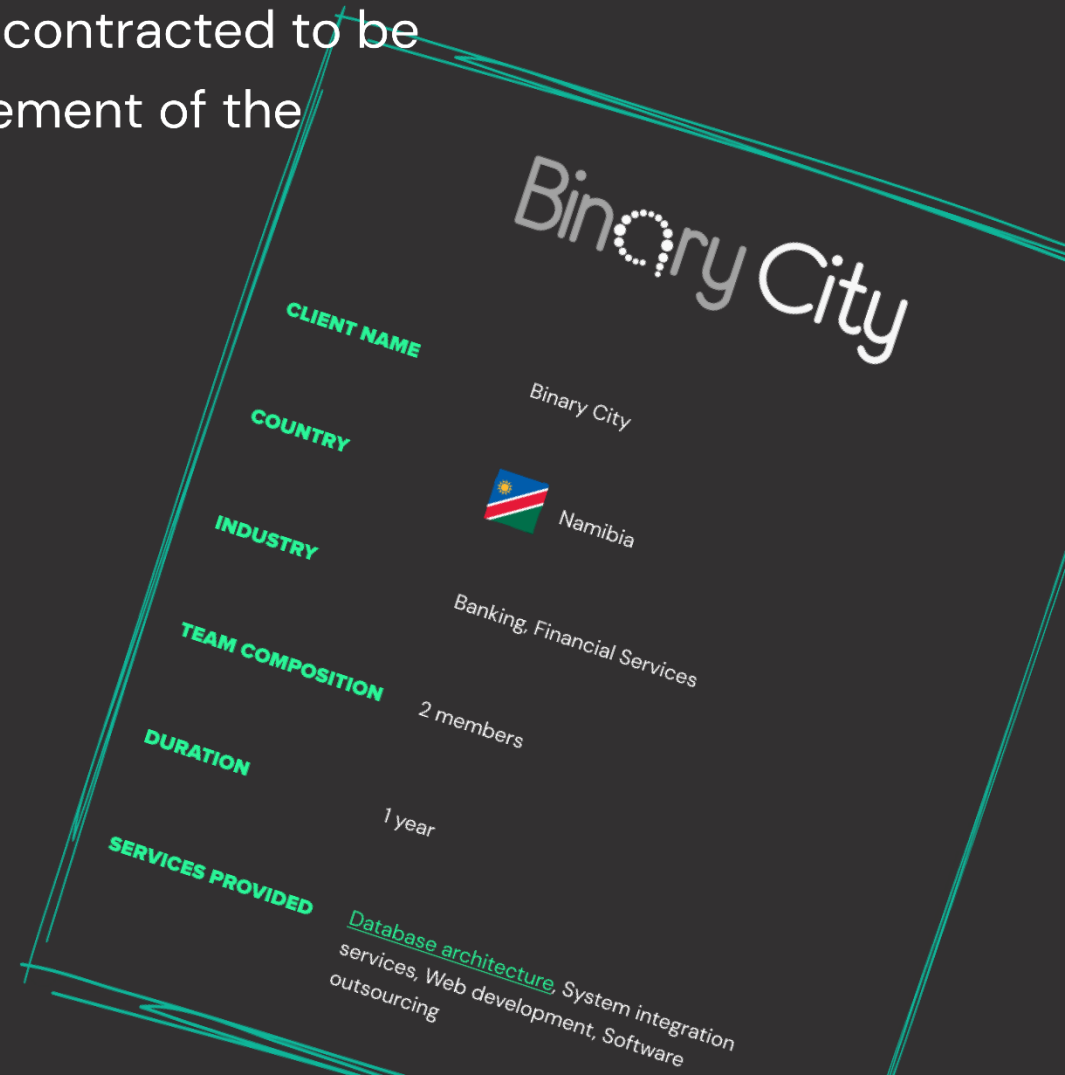

Feedback: "I highly recommend the team for any complex, multi-faceted modern application development projects and look forward to our continued association." *Al Segian Project Leader, Dwel Online*

CASE STUDY: WEALTH MANAGEMENT SYSTEM

CHALLENGE:

Enhance the existing wealth management system of the client. As part of the agreement with the end client, CodeRiders was subcontracted to be part of the software development team on this enhancement of the existing systems project.

CLIENT NAME	Binary City
COUNTRY	 Namibia
INDUSTRY	Banking, Financial Services
TEAM COMPOSITION	2 members
DURATION	1 year
SERVICES PROVIDED	Database architecture , System integration services, Web development, Software outsourcing

CASE STUDY: WEALTH MANAGEMENT SYSTEM

SOLUTION:

During the 12-month project, we created and worked on such functionalities as:

- ✓ Create transaction
- ✓ Transfer balance to another account
- ✓ Various file type generation (XML, CSV, TXT, etc.) for sending requests to banks
- ✓ Various types of bank response parsing, reports generation (web view, PDF generation, XLSX generation)

Feedback: "CodeRiders was a very efficient software development house, and were very responsive to our communication. The management team went out of their way to remain fair and open to any negotiations that needed to occur throughout the project."

Gideon van den Berg, Development department coordinator, Binary City

CASE STUDY: CAR SERVICE APP

CHALLENGE:

In Armenia, it is challenging for drivers to find reliable mechanics and repair specialists for their cars, as very few car repair service providers are represented online. Many drivers often face the inconvenience of making numerous phone calls or relying on friends to locate a trustworthy specialist or company. Recognizing this problem firsthand, the team at CodeRiders decided to develop an app that would bring together the best mechanics in Armenia, providing drivers with a convenient solution.

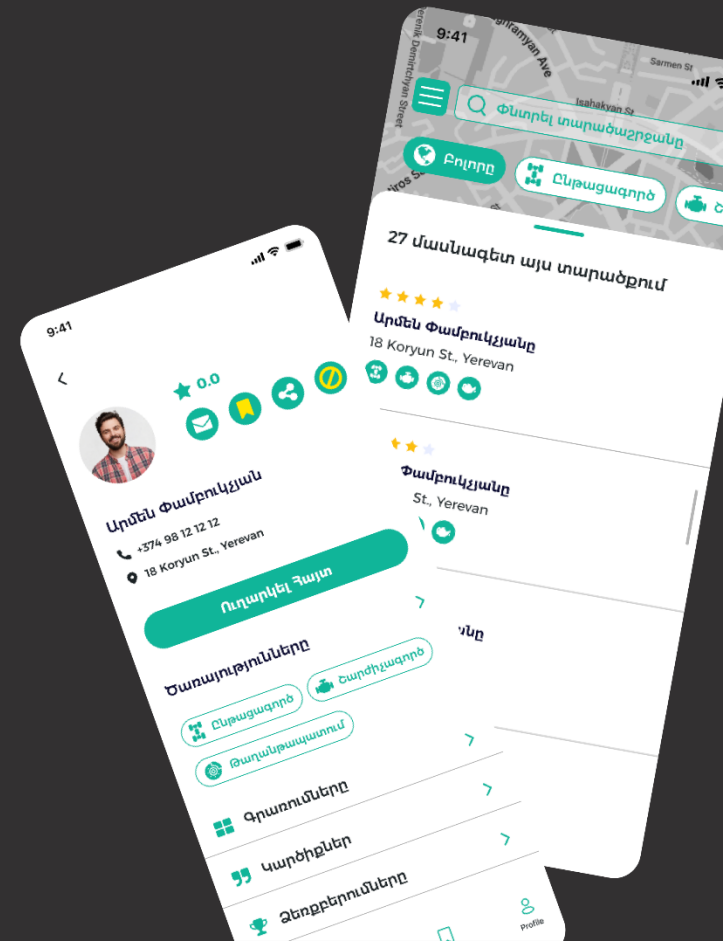

RIDER

CASE STUDY: CAR SERVICE APP

SOLUTION:

The car service app is designed for:

- ✓ Facilitating and expediting the process of finding and contacting qualified specialists
- ✓ Easy search for car service providers
- ✓ Easy access to in-detail information on how to get in touch with the top specialists in Armenia
- ✓ Simple and fast communication between the driver and specialist
- ✓ Simple and fast communication between the driver and specialist
- ✓ Opportunity for drivers to learn more about specialists' expertise through networking and first-hand reviews
- ✓ Opportunity for specialists to represent their services and gain recognition without much investment
