XB Software's Unique Position

We're unique in providing project and resource management solutions, whether it's time, fleet, assets, customers, people or whatever. XB Software is more than an IT service provider.

What makes us different is that we offer a choice between world's best technology solutions and the technologies we develop ourselves - Webix & DHTMLX.

Flutter

Full-Cycle Development Process

The work on the project is divided into the following phases:

Maintenance

after-deployment period necessary for application quality control, and its performance improvement

Deployment

Process of installing and configuring the developed application on the customer's environment

Development

back-end, front-end and design development in compliance with customer's requirements
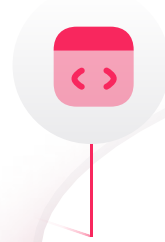

Testing

Quality control at all stages, from the initial steps of development to the application deployment
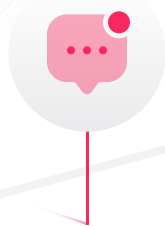

Discovery

Planning stage dedicated to requirements gathering and their thorough analysis

Engagement Models

*BFS - Budget with a Float Scope

	Time & Materials	BFS *	Fixed Price
Project Size	Medium and large	Small and medium	Small and medium
Project Duration	Any	Up to 6 months	Up to 3 months
Project Scope	Implementation during the project process	Implementation during the project process. Preliminary project scope, including the estimated budget for each milestone. The functional specification is created during the implementation within the budget.	Detailed specification completed before the project start
Client control of the progress	Full control of the everyday progress	Medium control, close cooperation in order to stay within the budget	Low control of the process, only the results of the sprint / milestone / project stage
Project cost	Based on the time spent, does not include the potential risks	The price will not go beyond the budget	Based on the predictable time spent + risks
Reports	Daily reports	By request	No
Methodology	Agile (Scrum, Kanban, Scrumban)	Agile within the budget	Waterfall
